

Doesn't Stop at the Walls

Engineered for the rigorous demands of Virtual Production, In-Camera VFX, and immersive experiences.

Tour-Ready Durability

High-Impact Resin Surface

Rapid, Tool-Free Assembly

Flawless On-Camera Visuals

Realistic Ground Reflections

Interactive Digital Canvas

Seamless Ecosystem Integration

Designed as the foundational element for HOLODECK LED™ VP volumes, HoloFloor™ pairs perfectly with HoloDeck walls and HoloSky™ ceilings for a truly immersive virtual stage.

Built for the Battlefield of Production

In modern production, the stage is no longer just a platform—it's part of the canvas. Virtual environments demand a seamless, robust, and camera-perfect surface.

Enter HoloFloor™. The definitive solution for grounding your digital worlds in reality.

Built to perform under pressure, HoloFloor™ provides the unyielding, high-fidelity surface essential for today's most ambitious productions.

150° Angle View

Uncompromising Durability

A robust Aluminum Die-Cast chassis ensures reliability and withstands the demanding environment of a busy production set.

Flawless On-Camera Performance

With refresh rates up to 7680 Hz and advanced Brompton R2 processing, HoloFloor™ delivers pristine, flicker-free imagery directly to the camera sensor.

True-to-Life Color Fidelity

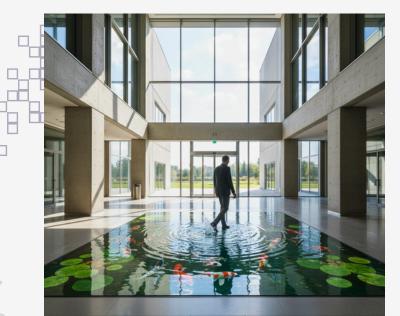

Achieve stunning realism with extensive color gamut coverage, including up to 99.6% of DCI-P3, for perfect color matching between your physical and digital assets.

______04

Broadcast & Live Events

Create dynamic, visually stunning stages for broadcast studios and live productions that captivate audiences both in-person and on-screen.

Immersive Installations

Transform architectural spaces, interactive exhibits, and retail environments with a durable and spectacular flooring solution that redefines the visitor experience.

WHERE VISION TAKES THE STAGE

Ready to see how HoloFloor™ can redefine your production capabilities?

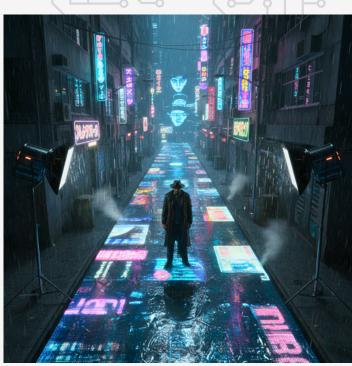

Virtual Production & XR

The essential ground plane for actors and props within ICVFX and XR stages, enabling seamless interaction with virtual environments.
